 PORTFOLIO
 OCTOBER 31, 2017 (Unaudited)**

Dear Shareholders:

As one can see from the table below, domestic equity returns were exceptionally strong in fiscal 2017 across all market cap and style categories. To some degree, these gains can be attributed to the election of President Trump last November, and the expectation that he and the Republican controlled Congress will be able to advance a pro-growth agenda, consisting of corporate tax reform, reduced regulation and major infrastructure spending. The bigger driver of this year's market strength, however, was the mounting evidence of accelerating economic growth, both in the U.S. and globally. Most importantly, after three years of stagnant earnings, corporate profits have begun to grow again in the U.S at the same time consumer and business confidence are reaching multi-year highs.

From a market perspective, the most important news of the year came from the U.S. Federal Reserve, which indicated that, in addition to increasing the Fed Funds rate, it will soon begin to shrink the multi-trillion dollar balance sheet of bonds that it has accumulated since the beginning of the financial crisis in 2008. The size of the Fed's balance sheet, of course, is unprecedented, so it is unclear what, if any, impact this will have on the markets in the future. For now, the market has viewed the Fed's moves positively as a sign of an improved economic outlook and seems content that the Central Bank will move gradually. Of course, this sanguine disposition could change if the long dormant inflation rate begins to pick up.

Unsurprisingly, small cap stocks, as measured by the Russell 2000® Index, outperformed their larger cap peers, as measured by the S&P 500 Index, with a 27.85% return; as these more domestically oriented companies stand to gain the most from a potential reduction in corporate taxes and a reduced regulatory burden. The ICM Small Company Portfolio (the "Fund" or the "Portfolio") outpaced this result with a 32.07% gain, which also topped the 24.81% advance of its benchmark, the Russell 2000® Value Index (the "Benchmark").

**The returns shown for the ICM Small Company Portfolio are net of all fees and expenses.*

Total annual Fund operating expenses are 0.95%.

Periods greater than one year are annualized. Total returns assume reinvestment of all dividends and capital gains.

The performance data quoted represents past performance. Past performance does not guarantee future results. The Russell Indexes and the Standard & Poor's 500 Index are unmanaged indexes. One cannot invest directly in an index. The Russell Indexes and the S&P 500 Index returns do not reflect any management fees, expenses, or transaction costs. The investment return and principal value of an investment will fluctuate so that an investor's shares when redeemed may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-866-234-5426.

The Fund's Technology holdings produced excellent absolute and relative returns this year, gaining 61.4%, which far outpaced the 31.5% return of the benchmark constituents. The strength was broad based but Novanta Inc. was a standout performer, climbing 171.1%. Over the last five years, this underfollowed company has transformed itself from a supplier of laser and associated devices to the cyclical semiconductor equipment industry, to a supplier of high value components to the faster growing healthcare industry. While the Technology sector has been a strong contributor to the Fund's performance in recent years, with several holdings exceeding our price targets, we have begun to reduce the Fund's weighting in this sector.

The Financial Services sector, and bank stocks in particular, were also strong performers in fiscal 2017, benefitting from both the increases in the Fed Funds rate, and the prospect of a more favorable regulatory environment under a Trump administration. Given that they generate profits solely from domestic operations, small cap regional banks would also be one of the biggest beneficiaries of the

THE ADVISORS' INNER CIRCLE FUND **ICM SMALL COMPANY
PORTFOLIO**
OCTOBER 31, 2017 *(Unaudited)*

Administration's proposed lower corporate tax rate. Although the Fund was underweight the sector, this was more than offset by the strong outperformance of the Portfolio's Financial Service holdings, which gained 37.4% versus a 30.9% return for the benchmark peers. This was achieved by strong outperformance of the Fund's bank stocks, which advanced 38.4% compared to 30.8% for the average small cap bank.

Despite continued rising employment in the U.S., Consumer Discretionary shares lagged this past year with a 19.1% gain. The Fund's holdings fared much better, climbing 32.3%, which was a significant contributor to overall outperformance of the benchmark. Recreational vehicle manufacturer Winnebago Industries, which gained 76.4%, was a major contributor to this strong performance. New leadership at Winnebago is improving the performance of the company and recently made a well-received acquisition of a leading player in the fast growing towable market. The company also has a U.S. based manufacturing footprint, making it another potential beneficiary of lower corporate tax rates. The Portfolio also benefitted from an above benchmark exposure to the homebuilding subsector, which advanced 67.1% as new homes sales continue to recover from cyclical lows of the past few years.

The only sizeable drag on relative performance this fiscal period came from the underperformance of the Portfolio's Producer Durables investments, which despite rising 27.9%, failed to keep pace with the 37.6% gain for the benchmark peers. The Fund's investment in ocean freight carrier Matson, Inc., which declined 30.2%, was the biggest contributor to this shortfall. The weakness in Matson's shares occurred on news that a new competitor would enter the company's profitable Hawaii shipping lane and disrupt the current duopoly. We think the risk of a new entrant is overblown and several years away if it occurs at all. We believe with one of the best balance sheets in the industry and an enterprise to EBITDA ratio of just 6.3 times, the shares are a compelling value.

The current economic background is the strongest in several years and should be conducive to further solid corporate profit growth. For the S&P 500, analysts currently forecast earnings growth of 10% in 2017 and another 11% growth in 2018, even before the potential positive impact of any corporate tax rate reduction. Our enthusiasm, however, is tempered by the fact that the market, as defined by the S&P 500 Index, is in our opinion now fully valued, trading at 20 times and 18 times these estimates respectively. As has been the case for several years, small cap stocks trade at even higher multiples of projected earnings. We are aware that markets can overshoot to the upside, but we continue to believe that as the economy enters the later stages of expansion, and the Federal Reserve and other

THE ADVISORS' INNER CIRCLE FUND **ICM SMALL COMPANY**

Neither this material nor any accompanying oral presentation or remarks by a representative is intended to constitute a recommendation of the Fund or a determination of suitability.

Portfolio holdings are subject to change and should not be considered investment advice or a recommendation to buy securities.

There are risks involved with investing in mutual funds, including loss of principal. In addition to the normal risks involved with investing in mutual funds, including loss of principal, investments in smaller companies typically exhibit higher volatility. Current and future holdings are subject to risk.

EBITDA - Earnings before interest, taxes, depreciation and amortization.

Index returns are for illustrative purposes only and do not represent actual fund performance. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

Definition of the Comparative Indices

Russell 2000® Value Index is a subset of the Russell 2000® Index that contains those securities with lower price-to-book and price-earnings ratios, higher dividend yields and lower forecasted growth values than the growth universe.

Russell 2000® Index is an unmanaged index comprised of 2,000 stocks of U.S. companies with small market capitalization.

Russell 2000® Growth Index is a subset of the Russell 2000® Index that contains those securities with higher price-to-book ratios and price-earnings ratios, lower dividend yields and higher forecasted growth values than the value universe.

S&P 500 Index is an unmanaged index containing common stocks of 500 industrial, transportation, utility and financial companies, regarded as generally representative of the U.S. stock market. The return per the total return index reflects the reinvestment of income dividends and capital gain distributions, if any, but does not reflect fees, brokerage commissions, or other expenses of investing.

* The ICM Small Company Portfolio commenced operations on April 19, 1989.

The performance data quoted herein represents past performance and the return and value of an investment in the Portfolio will fluctuate so that, when redeemed, may be worth less than its original cost.

The Portfolio's performance assumes the reinvestment of dividends and capital gains. Index returns assume reinvestment of dividends and, unlike a portfolio's returns, do not reflect any fees or expenses. If such fees and expenses were included in the index returns, the performance would have been lower. Please note that one cannot invest directly in an unmanaged index.

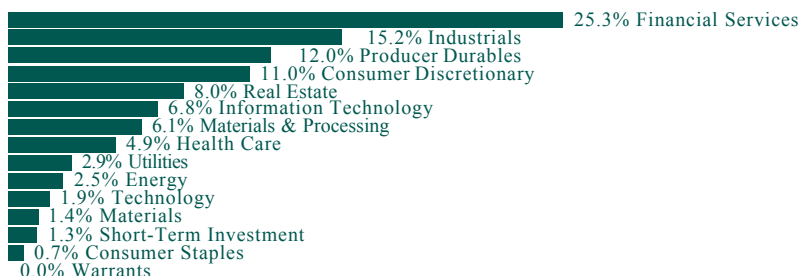

There are no assurances that the Portfolio will meet its stated objectives. The Portfolio's holdings and allocations are subject to change because it is actively managed and should not be considered recommendations to buy individual securities.

Returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.

See definition of comparative indices on page 5.

* Per share calculations were performed using average shares for the period.

† Returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of shares.

- (1) Realized and unrealized gains and losses per share in this caption are balancing amounts necessary to reconcile the change in net asset value per share for the period, and may not reconcile with the aggregate gains and losses in the Statement of Operations due to share transactions for the period.
- (2) The Ratio of Expenses to Average Net Assets excludes the effect of fees paid indirectly. If these expense offsets were included, the ratio would have been the same as the ratio reported.

The accompanying notes are an integral part of the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

1. Organization:

The Advisors' Inner Circle Fund (the "Trust") is organized as a Massachusetts business trust under an Amended and Restated Agreement and Declaration of Trust dated February 18, 1997. The Trust is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company with 53 portfolios. The financial statements herein are those of the ICM Small Company Portfolio (the "Portfolio"). The Portfolio seeks maximum, long-term total return consistent with reasonable risk to principal by investing primarily in common stocks of smaller companies measured in terms of revenues and assets and, more importantly, in terms of market capitalization. The Portfolio, a diversified portfolio, normally seeks to achieve its objective by investing at least 80% of its net assets, plus any borrowings for investment purposes, in common stocks of companies that have market capitalizations within the range of the Russell 2000 Value Index at the time of purchase. The Portfolio may invest in equity securities listed on the New York and American Stock Exchanges or traded on the over-the-counter markets operated by the FINRA. The Portfolio invests mainly in common stocks, but it may also invest in other types of equity securities. The financial statements of the remaining portfolios of the Trust are presented separately. The assets of each portfolio are segregated, and a shareholder's interest is limited to the portfolio in which shares are held.

2. Significant Accounting Policies:

The following is a summary of the significant accounting policies followed by the Portfolio.

Use of Estimates — The Portfolio is an investment company as defined in accounting principles generally accepted in the United States of America ("U.S. GAAP"). Therefore, the Portfolio follows the accounting and reporting guidelines for investment companies. The preparation of financial statements, in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and such differences could be material.

Security Valuation — Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the

counter, are valued at the last quoted sale price on an exchange or market (foreign or domestic) on which they are traded, or, if there is no such reported sale, at the most recent quoted bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used.

Securities for which market prices are not “readily available” are valued in accordance with fair value procedures established by the Portfolio’s Board of Trustees (the “Board”). The Portfolio’s fair value procedures are implemented through a fair value pricing committee (the “Committee”) designated by the Board. Some of the more common reasons that may necessitate that a security be valued using fair value procedures include: the security’s trading has been halted or suspended; the security has been de-listed from a national exchange; the security’s primary trading market is temporarily closed at a time when under normal conditions it would be open; the security has not been traded for an extended period of time; the security’s primary pricing source is not able or willing to provide a price; or trading of the security is subject to local government-imposed restrictions. When a security is valued in accordance with the fair value procedures, the Committee will determine the value after taking into consideration relevant information reasonably available to the Committee.

In accordance with the authoritative guidance on fair value measurements and disclosure under U.S. GAAP, the Portfolio discloses fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1 — Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that the Portfolio has the ability to access at the measurement date;
- Level 2 — Quoted prices which are not active, or inputs that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 — Prices, inputs or exotic modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no market activity).

**THE ADVISORS' INNER CIRCLE FUND ICM SMALL COMPANY
PORTFOLIO
OCTOBER 31, 2017**

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Investments are classified within the level of the lowest significant input considered in determining fair value. Investments classified within Level 3 whose fair value measurement considers several inputs may include Level 1 or Level 2 inputs as components of the overall fair value measurement.

The following is a list of the level of inputs used as of October 31, 2017 when valuing the Portfolio's investments:

Investments in Securities	Level 1	Level 2	Level 3*	Total
Common Stock	\$ 758,061,744	\$ —	\$ —	\$ 758,061,744
Warrants	—	—	—	—
Short-Term Investment	9,973,186	—	—	9,973,186
Total Investments in Securities	\$ 768,034,930	\$ —	\$ —	\$ 768,034,930

* Portfolio investment in warrants is considered Level 3.

For the year ended October 31, 2017, there have been no transfers between Level 1 and Level 2 assets and liabilities. For the year ended October 31, 2017, there were Level 3 securities. All transfers, if any, are recognized by the Portfolio at the end of the year.

For the year ended October 31, 2017, there have been no significant changes to the Portfolio's fair value methodologies.

Federal Income Taxes — It is the Portfolio's intention to continue to qualify as a regulated investment company for Federal income tax purposes by complying with the appropriate provisions of Subchapter M of the Internal Revenue Code of 1986, as amended. Accordingly, no provision for Federal income taxes has been made in the financial statements.

The Portfolio evaluates tax positions taken or expected to be taken in the course of preparing the Portfolio's tax returns to determine whether it is "more-likely-than-not" (i.e., greater than 50-percent) that each tax position will be sustained upon examination by a taxing authority based on the technical merits of the position. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. The Portfolio did not record any tax provision in the current period. However, management's conclusions regarding tax positions taken may be subject to review and adjustment at a later date based on factors including, but not limited to, examination by tax authorities (i.e., the last 3 tax year ends, as applicable), on-going analysis of and changes to tax laws, regulations and interpretations thereof.

**THE ADVISORS' INNER CIRCLE FUND ICM SMALL COMPANY
PORTFOLIO
OCTOBER 31, 2017**

The Portfolio utilizes a tax practice that treats a portion of the proceeds from each redemption of capital shares as a distribution of taxable net investment income and/or realized capital gain.

As of the year ended October 31, 2017, the Portfolio did not have a liability for any unrecognized tax benefits. The Portfolio recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the year the Portfolio did not incur any significant interest or penalties.

Security Transactions and Investment Income — Security transactions are accounted for on trade date. Costs used in determining realized gains and losses on the sale of investment securities are based on the specific identification method. Dividend income is recorded on the ex-dividend date. Interest income is recognized on the accrual basis from settlement date.

Expenses — Most expenses of the Trust can be directly attributed to a particular portfolio. Expenses which cannot be directly attributed to a particular portfolio are apportioned among the portfolios of the Trust based on the number of portfolios and/or relative net assets.

Dividends and Distributions to Shareholders — The Portfolio distributes substantially all of its net investment income, if any, quarterly. Any net realized capital gains are distributed at least annually. All distributions are recorded on ex-dividend date. The Portfolio's distributions to shareholders may include return of capital received from Real Estate Investment Trusts ("REITs").

Investments in REITs — With respect to the Portfolio, dividend income is recorded based on the income included in distributions received from the REIT investments using published REIT reclassifications including some management estimates when actual amounts are not available. Distributions received in excess of this estimated amount are recorded as a reduction of the cost of investments or reclassified to capital gains. The actual amounts of income, return of capital, and capital gains are only determined by each REIT after its fiscal year-end, and may differ from the estimated amounts.

Master Limited Partnerships — The Portfolio may invest in master limited partnerships ("MLPs"). MLPs are limited partnerships or limited liability companies, whose partnership units or limited liability interests are listed and traded on a U.S. securities exchange, and are treated as publicly traded partnerships for federal income tax purposes. To qualify to be treated as a partnership for tax purposes, a MLP must receive at least 90% of its income from qualifying sources as set forth in Section 7704(d) of the Internal Revenue

Code of 1986, as amended (the “Code”). These qualifying sources include activities such as the exploration, development, mining, production, processing, refining, transportation, storage and marketing of mineral or natural resources. MLPs generally have two classes of owners, the general partner and limited partners. MLPs that are formed as limited liability companies generally have two analogous classes of owners, the managing member and the members. For purposes of this section, references to general partners also apply to managing members and references to limited partners also apply to members. The general partner is typically owned by a major energy company, an investment fund, the direct management of the MLP or is an entity owned by one or more of such parties. The general partner may be structured as a private or publicly traded corporation or other entity. The general partner typically controls the operations and management of the MLP through an equity interest of as much as 2% in the MLP plus, in many cases, ownership of common units and subordinated units. Limited partners own the remainder of the MLP through ownership of common units and have a limited role in the MLP’s operations and management.

3. Transactions with Affiliates:

Certain officers of the Trust are also employees of SEI Investments Global Funds Services (the “Administrator”), a wholly owned subsidiary of SEI Investments Company, and/or SEI Investments Distribution Co. (the “Distributor”). Such officers are paid no fees by the Trust, other than the Chief Compliance Officer (“CCO”) as described below, for serving as officers of the Trust.

The services provided by the CCO and his staff, whom are employees of the Administrator, are paid for by the Trust as incurred. The services include regulatory oversight of the Trust’s Advisers and service providers as required by SEC regulations. The CCO’s services have been approved by the Board.

4. Administration, Distribution, Shareholder Servicing, Transfer Agent and Custodian Agreements:

The Portfolio and the Administrator are parties to an Administration Agreement, under which the Administrator provides administrative services to the Portfolio. For these services, the administrator is paid an asset-based fee, which will vary depending on the number of share classes and the average daily net assets of the Portfolio. For the year ended October 31, 2017, the Portfolio paid \$462,192 for these services.

The Trust and the Distributor are parties to a Distribution Agreement. The Distributor receives no fees under the agreement.

**THE ADVISORS' INNER CIRCLE FUND ICM SMALL COMPANY
PORTFOLIO
OCTOBER 31, 2017**

Certain brokers, dealers, banks, trust companies and other financial representatives receive compensation from the Portfolio for providing a variety of services, including record keeping and transaction processing. Such fees are based on the assets of the Portfolio that are serviced by the financial representative. Such fees are paid by the Portfolio to the extent that the number of accounts serviced by the financial representative multiplied by the account fee charged by the Portfolio's transfer agent would not exceed the amount that would have been charged had the accounts serviced by the financial representative been registered directly through the transfer agent. All fees in excess of this calculated amount are paid by Investment Counselors of Maryland, LLC (the "Adviser"). These fees are disclosed on the Statement of Operations as Shareholder Servicing Fees.

DST Systems, Inc. serves as the transfer agent and dividend disbursing agent for the Portfolio under a transfer agency agreement with the Trust.

The Portfolio may earn cash management credits which can be used to offset transfer agent expenses. For the year ended October 31, 2017, the Portfolio earned credits of \$133 which were used to offset transfer agent expenses. This amount is labeled as "Fees Paid Indirectly" on the Statement of Operations.

MUFG Union Bank, N.A. acts as custodian (the "Custodian") for the Portfolio. The Custodian plays no role in determining the investment policies of the Portfolio or which securities are to be purchased or sold by the Portfolio.

5. Investment Advisory Agreement:

Under the terms of an investment advisory agreement, the Adviser, owned in part by Old ICM, Inc., a company wholly-owned by OMAM Inc. and ICM Management LLC, a company wholly-owned by six officers of the Adviser, provides investment advisory services to the Portfolio at a fee calculated at an annual rate of 0.70% of the Portfolio's average daily net assets.

6. Investment Transactions:

For the year ended October 31, 2017, the Portfolio made purchases of \$217,573,966 and had sales of \$256,277,125 of investment securities other than long-term U.S. Government and short-term securities. There were no purchases or sales of long-term U.S. Government securities.

7. Federal Tax Information:

The amount and character of income and capital gain distributions to be paid, if any, are determined in accordance with Federal income tax regulations, which may differ from U.S. generally accepted accounting principles or ("U.S. GAAP").

**THE ADVISORS' INNER CIRCLE FUND ICM SMALL COMPANY
PORTFOLIO
OCTOBER 31, 2017**

As a result, the net investment income (loss) and net realized gain (loss) on investment transactions for a reporting period may differ significantly from distributions made during such period. These book/tax differences may be temporary or permanent in nature.

Accordingly, the following permanent differences that are primarily attributable to REIT adjustments, basis adjustments related to investments in partnerships, utilization of earnings and profits on shareholder redemptions, in-kind transfer of securities and reclass of distributions have been reclassified to (from) the following accounts:

<u>Undistributed Net Investment Income</u>	<u>Accumulated Net Realized Gain</u>	<u>Paid-In-Capital</u>
\$ 387,137	\$ (75,823,419)	\$ 75,436,282

The tax character of ordinary dividends and capital gain distributions declared during the last two fiscal years was as follows:

	<u>Ordinary Income</u>	<u>Long -Term Capital Gains</u>	<u>Total</u>
2017	\$ 1,650,909	\$ 18,593,538	\$ 20,244,447
2016	4,807,039	98,909,742	103,716,781

As of October 31, 2017, the components of Distributable Earnings on a tax basis were as follows:

Undistributed Ordinary Income	\$ 5,525,333
Undistributed Long-Term Capital Gains	49,899,954
Net Unrealized Appreciation	183,513,113
Other Temporary Differences	20
Total Distributable Earnings	<u>\$ 238,938,420</u>

For Federal income tax purposes, the difference between Federal tax cost and book cost primarily relates to partnership basis adjustments and wash sales which cannot be used for Federal income tax purposes currently have been deferred for use in future years.

The Federal tax cost and aggregate gross unrealized appreciation and depreciation on investments, held by the Portfolio at October 31, 2017, were as follows:

<u>Federal Tax Cost</u>	<u>Aggregate Gross Unrealized Appreciation</u>	<u>Aggregate Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
\$ 584,521,817	\$ 203,534,146	\$ (20,021,033)	\$ 183,513,113

8. Concentration of Risks:

Equity Risk – Since it purchases equity securities, the Fund is subject to the risk that stock prices may fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund's equity securities may fluctuate drastically from day-to-day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

REIT Risk – REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: declines in property values; increases in property taxes, operating expenses, interest rates or competition; overbuilding; zoning changes; and losses from casualty or condemnation. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this prospectus.

Foreign Securities Risk – The Fund's investments in ADRs are subject to foreign securities risk. ADRs are certificates evidencing ownership of shares of a foreign issuer that are issued by depositary banks and traded on U.S. exchanges. Although ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies, they continue to be subject to many of the risks associated with investing directly in foreign securities.

Foreign securities, especially those of companies in emerging markets, can be riskier and more volatile than domestic securities. Adverse political and economic developments or changes in the value of foreign currency can make it harder for the Fund to sell its securities and could reduce the value of your shares. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities may be reduced by a withholding tax at the source, which tax would reduce income received from the securities. Foreign securities may also be more difficult to value than securities of U.S. issuers.

Small-Capitalization Company Risk – The small-capitalization companies in which the Fund will invest may be more vulnerable to adverse business or economic

**THE ADVISORS' INNER CIRCLE FUND ICM SMALL COMPANY
PORTFOLIO
OCTOBER 31, 2017**

events than larger, more established companies. In particular, investments in these small-sized companies may pose additional risks, including liquidity risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small-cap stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange. In the normal course of business, the Portfolio enters into contracts that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is dependent on future claims that may be made against the Portfolio and, therefore, cannot be established; however, based on experience, the risk of loss from such claim is considered remote.

9. Other:

At October 31, 2017, 54% of total shares outstanding were held by three record shareholders each owning 10% or greater of the aggregate total shares outstanding. These shareholders were comprised of omnibus accounts that were held on behalf of various shareholders.

In the normal course of business, the Portfolio enters into contracts that provide general indemnifications. The Portfolio's maximum exposure under these arrangements is dependent on future claims that may be made against the Portfolio and, therefore, cannot be established; however, based on experience, the risk of loss from such claim is considered remote.

10. In-Kind Transfer of Securities

During the year ended October 31, 2017, the Portfolio redeemed shares of beneficial interest in exchange for securities. The securities were transferred at their current value on the date of the transaction.

<u>Transaction Date</u>	<u>Institutional Shares Redeemed</u>	<u>Value</u>	<u>Realized Gain</u>
11/29/16	3,155,505	\$98,893,515	\$32,325,895
12/16/16	2,431,683	79,102,645	26,149,306
			<u>\$58,475,201</u>

During the year ended October 31, 2016, the Portfolio redeemed shares of beneficial interest in exchange for securities. The securities were transferred at their current value on the date of the transaction.

PORTFOLIO
OCTOBER 31, 2017**

<u>Transaction Date</u>	<u>Institutional Shares Redeemed</u>	<u>Value</u>	<u>Realized Gain</u>
07/01/16	8,601,243	\$228,449,016	\$60,061,978

11. Regulatory Matters:

In October 2016, the U.S. Securities and Exchange Commission adopted new rules and amended existing rules (together, final rules) intended to modernize the reporting and disclosure of information by registered investment companies. In part, the final rules amended Regulation S-X and require standardized, enhanced disclosures about derivatives in investment company financial statements, as well as other amendments. As of August 1, 2017, management has implemented the amendments to Regulation S-X, which did not have a material impact on the Fund's financial statements and related disclosures or impact the Fund's net assets or results of operations.

12. Subsequent Events:

The Portfolio has evaluated the need for additional disclosures and/or adjustments resulting from subsequent events through the date the financial statements were issued. Based on this evaluation, no additional disclosures or adjustments were required to the financial statements.

THE ADVISORS' INNER CIRCLE FUND ICM SMALL COMPANY PORTFOLIO

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders of ICM Small Company Portfolio and the Board of Trustees of The Advisors' Inner Circle Fund

We have audited the accompanying statement of assets and liabilities of ICM Small Company Portfolio, a series of shares of beneficial interest in The Advisors' Inner Circle Fund, (the "Portfolio") including the schedule of investments, as of October 31, 2017, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the four-year period then ended. These financial statements and financial highlights are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for the year ended October 31, 2013 were audited by other auditors whose report dated December 24, 2013, expressed an unqualified opinion on such financial highlights.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of October 31, 2017 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provides a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of ICM Small Company Portfolio as of October 31, 2017, and the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and its financial highlights for each of the years in the four-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

DISCLOSURE OF PORTFOLIO EXPENSES

We believe it is important for you to understand the impact of fees regarding your investment. All mutual funds have operating expenses. As a shareholder of a mutual fund, you incur ongoing costs, which include costs for portfolio management, administrative services, and shareholder reports (like this one), among others. Operating expenses, which are deducted from a mutual fund's gross income, directly reduce the investment return of a mutual fund. A mutual fund's expenses are expressed as a percentage of its average net assets. This figure is known as the expense ratio. The following examples are intended to help you understand the ongoing fees (in dollars) of investing in your Portfolio and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (May 1, 2017 to October 31, 2017).

The table below illustrates your Portfolio's costs in two ways.

- **Actual Portfolio return.** This section helps you to estimate the actual expenses after fee waivers that you paid over the period. The "Ending Account Value" shown is derived from the Portfolio's actual return, and the fourth column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Portfolio. You may use the information here, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = \$8.6), then multiply the result by the number given for your Portfolio under the heading "Expenses Paid During Period."

- **Hypothetical 5% return.** This section is intended to help you compare your Portfolio's costs with those of other mutual funds. It assumes that the Portfolio had a return of 5% before expenses during the year, but that the expense ratio is unchanged. In this case, because the return used is not the Portfolio's actual return, the results do not apply to your investment. The example is useful in making comparisons because the Securities and Exchange Commission requires all mutual funds to calculate expenses based on a 5% return. You can assess your Portfolio's costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other mutual funds.

Note: Because the return is set at 5% for comparison purposes — NOT your Portfolio's actual return — the account values shown may not apply to your specific investment.

NOTICE TO SHAREHOLDERS (Unaudited)

For shareholders that do not have an October 31, 2017 tax year end, this notice is for informational purposes only. For shareholders with an October 31, 2017 tax year end, please consult your tax advisor as to the pertinence of this notice. For the fiscal year ended October 31, 2017, the Portfolio is designating the following items with regard to distributions paid during the year.

Long Term Capital Gain Distribution	Ordinary Income Distributions	Total Distributions	Dividends Qualifying for Corporate Dividend Receivable Deduction(1)	Qualifying Dividend Income(2)	U.S. Government Interest(3)	Interest Related Dividends(4)	Short-Term Capital Gain Dividends(5)
91.02%	8.98%	100.00%	100.00%	100.00%	0.00%	3.85%	100.00%

- (1) *Qualifying dividends represent dividends which qualify for the corporate dividends received deduction and are reflected as a percentage of ordinary income distributions (the total of short term capital gain and net investment income distributions).*
- (2) *The percentage in this column represents the amount of "Qualifying Dividend Income" as created by the Jobs and Growth Relief Reconciliation Act of 2003 and is reflected as a percentage of ordinary income distributions (the total of short term capital gain and net investment income distributions). It is the intention of each of the aforementioned funds to designate the maximum amount permitted by law.*
- (3) *"U.S. Government Interest" represents the amount of interest that was derived from direct U.S. Government obligations and distributed during the fiscal year. This amount is reflected as a percentage of ordinary income. Generally, interest from direct U.S. Government obligations is exempt from state income tax. However, for shareholders of the ICM Small Company Portfolio who are residents of California, Connecticut and New York, the statutory threshold requirements were not satisfied to permit exemption of these amounts from state income.*
- (4) *The percentage in this column represents the amount of "Interest Related Dividends" and is reflected as a percentage of ordinary income distribution that is exempted from U.S. withholding tax when paid to foreign investors.*
- (5) *The percentage of this column represents the amount of "Short Term Capital Gain Dividends" and is reflected as a percentage of short term capital gain distribution that is exempted from U.S. withholding tax when paid to foreign investors.*

The information reported herein may differ from the information and distributions taxable to the shareholders for the calendar year ending December 31, 2017. Complete information will be computed and reported in conjunction with your 2017 Form 1099-DIV.
